

UP CLOSE & PERSONAL

WITH NATIONAL GEOGRAPHIC EXPLORERS

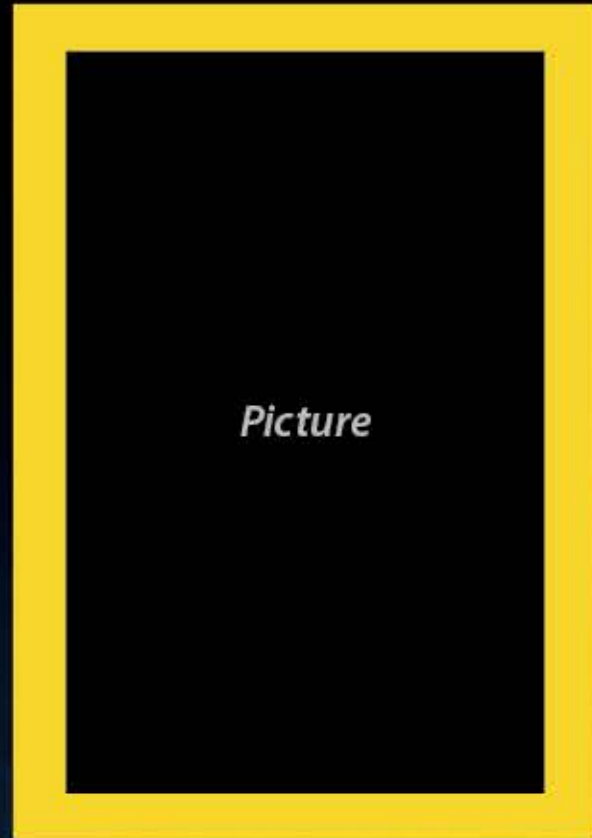

Spend some time learning about what some of **National Geographic's Explorers** do. Search for explorers on your own, or wait for videos of some of our favourite explorers to be released on our **Facebook** page (and **CEFL website**) every week. Add the details of the explorers to your template every week (or create your own poster!) until it's full. Don't forget to add yourself and what you'd love to explore! Have fun exploring!

We'll see you at the special webinar on **11 October** where you can meet **Archana Anand**, a Marine Biologist & National Geographic Explorer. She'll share some exciting information about exploring under the sea!
